

ABDULRAHMAN A

AWS Cloud & DevOps Engineer

Trichy, India | +91 8248088037 | abdulrahman90196@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Github](#)

PROFESSIONAL SUMMARY

AWS Cloud & DevOps Engineer with **1+ year of experience** in **AWS, Terraform (IaC), Docker, Linux, and CI/CD**. Skilled in infrastructure automation, reusable Terraform modules, containerized deployments, Linux server management, and implementing secure CI/CD pipelines using **GitHub Actions** and **AWS DevOps services**.

PROFESSIONAL EXPERIENCE

Role: Junior DevOps Engineer

CloudGarage LLP | July 2025 – Present

- Automated **AWS infrastructure provisioning** using Terraform and CI/CD pipelines.
- Managed **Linux servers**, Docker deployments, and production releases.
- Built **secure, scalable cloud solutions** while collaborating with cross-functional development teams.

PROJECTS

Auto Cloud – Multi-Cloud Automation Platform

Duration: March 2026 – June 2026

Tools: AWS • Terraform • GitHub Actions • Checkov

- Developed **reusable Terraform modules** for **EC2, VPC, S3, IPAM, ECR, ECS Fargate, Golden Image, SNS, and RDS**.
- Designed **scalable Terraform variable structures (tfvars)** for **dynamic infrastructure provisioning**.
- Integrated **Checkov** for Infrastructure as Code (IaC) **security Scanning** and **validation**.
- Automated **infrastructure deployment** using **GitHub Actions CI/CD pipelines**.
- Collaborated with **frontend and backend teams** to integrate cloud infrastructure with the application platform.

Sumisa Tech – AWS DevOps & CI/CD Platform

Duration: Dec 2025 – Feb 2026

Tools: AWS • Terraform • ECS Fargate • CodePipeline • CodeBuild • CodeDeploy

- Designed **AWS infrastructure** using Terraform.
- Built **CI/CD pipelines** using AWS CodePipeline, CodeBuild, and CodeDeploy.
- Implemented **Blue-Green deployments** on ECS Fargate.
- Configured **Application Load Balancer (ALB)** with multiple Target Groups.
- Designed a **secure VPC architecture** across two Availability Zones.
- Integrated **AWS WAF**, CloudWatch monitoring, SNS notifications, and IAM least-privilege policies.

Server Deployment & DevOps Operations

Duration: July 2025 – Present

Tools: Linux • Docker • Docker Compose • Nginx • GitHub Actions

- Deployed and maintained **Linux-based applications** in production environments.
- Containerized applications using **Docker** and Docker Compose.
- Configured **Nginx**, SSL, and domain mapping for secure application hosting.
- Automated **build, test, and deployment** using GitHub Actions.
- Performed **production deployments** through both automated and manual release processes.
- Managed deployments for **Vivagham Singapore, Labely, VRB Garments** and **AutoCloud**.

TECHNICAL SKILLS

Cloud (AWS):

EC2 | S3 | IAM | VPC | RDS | ECS Fargate | ECR | WAF | ELB | Route 53 | ACM | DynamoDB | CloudWatch | SNS | SQS | CloudTrail | CodePipeline | CodeBuild | CodeDeploy

OS & DevOps Tools:

Linux | Windows | Docker | Docker Compose | Terraform | Checkov | Nginx | Git | GitHub Actions | Kubernetes (Basic)

Programming & Database:

C | Python | Shell Scripting | MySQL

EDUCATION

B.Tech – Information Technology

University College of Engineering (BIT Campus), Anna University Trichy

Duration: Aug 2021 – Jun 2024

CGPA: 7.13/10

Diploma in Engineering

Kongunadu Polytechnic College, Trichy

Duration: Jun 2018 – Jul 2021

CGPA: 8.30/10

CERTIFICATIONS

Networking Basics

Cisco Networking Academy — Issued Mar 2026

Cloud Essentials

Naan Mudhalvan — Issued Mar 2023

AWS Cloud Engineer Intern

Cloudgarage LLP — April 2025 to June 2025
